

Interdisciplinary learning is a planned approach that integrates multiple disciplines and provides real-world learning opportunities to deepen student learning. Use this guide to plan your own interdisciplinary learning lesson.

6 STEPS FOR DEVELOPING AN INTERDISCIPLINARY LESSON:

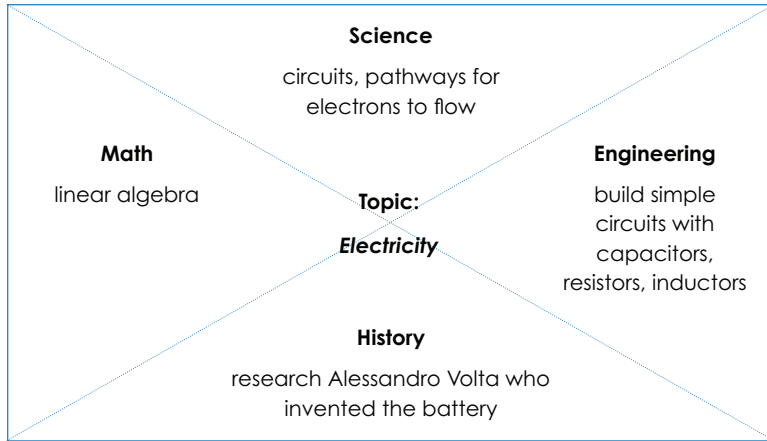

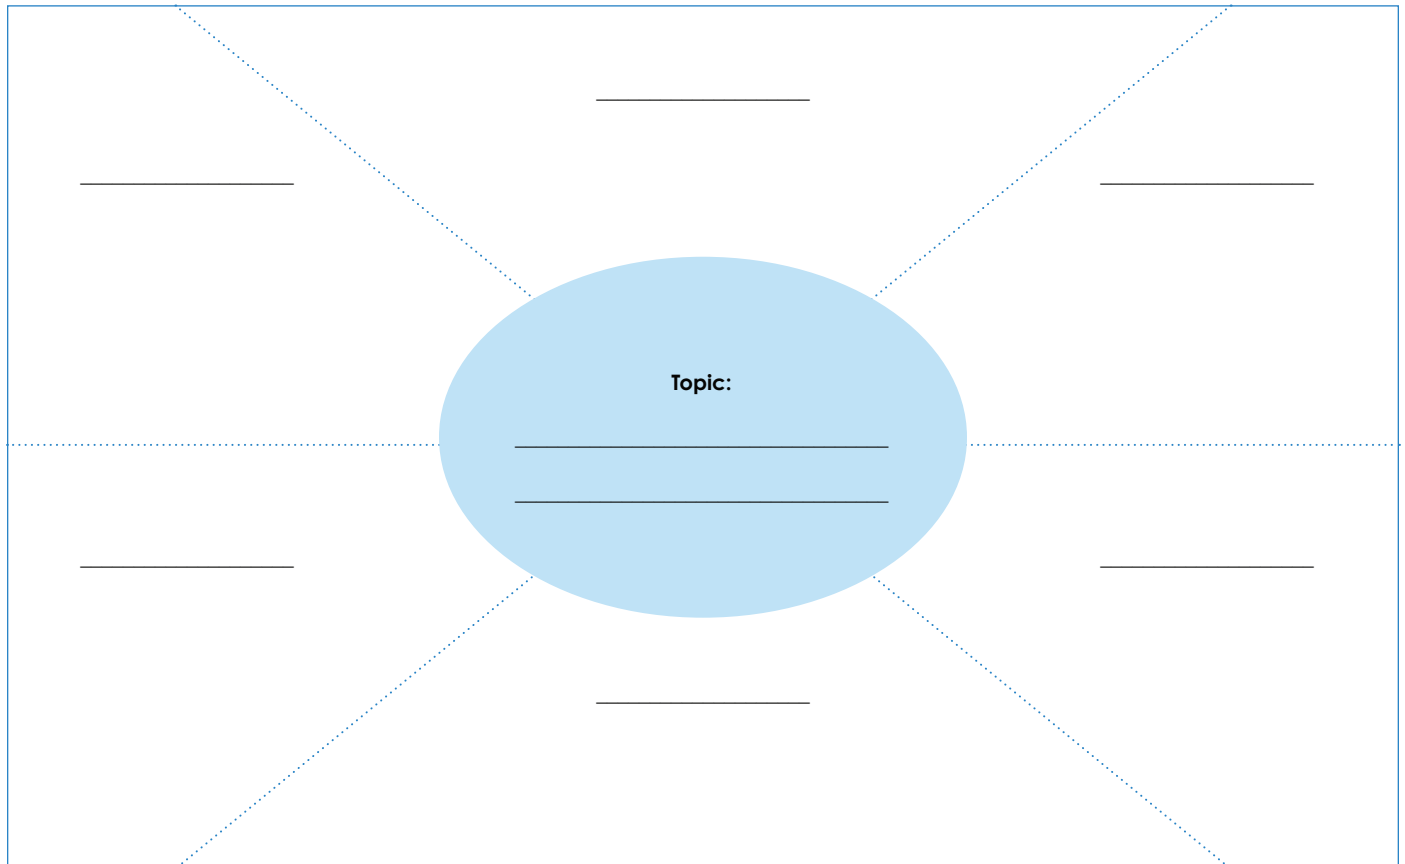

- | | | |
|--------------------------|---------------------------------|-------------------------------|
| 1. Select a topic | 2. Define learning objectives | 3. Consider other disciplines |
| 4. Prioritize activities | 5. Determine evaluation methods | 6. Plan Lesson Sequence |

TOPIC:

LEARNING OBJECTIVES:

DISCIPLINES THAT CAN BE INCLUDED IN THE LESSON:

Use this example to guide you in planning for the disciplines you can include in your lesson. The example includes four disciplines. The template allows for up to six disciplines to be included, based on your topic.

The template is a large rectangle divided into four quadrants by two diagonal dotted lines. In the center is a light blue oval containing the text: **Topic:**

_____. Each quadrant contains a horizontal line for planning:

- Top-left: _____
- Top-right: _____
- Bottom-left: _____
- Bottom-right: _____

PRIORITIZE ACTIVITIES:

Consider the activities listed in the previous section and prioritize them based on the connection to the established learning objectives.

EVALUATION:

Now consider how you will evaluate students, keeping in mind to measure their application and development of the 4Cs: Critical Thinking, Communication, Collaboration and Creativity.

LESSON SEQUENCE:

Put it all together. Organize your activities based on your students' schema.
