

How are you a STEM Educator?

STEM is an interdisciplinary approach to teaching and learning that emphasizes design principles and real-world connections, wherein students are given authentic opportunities, using integrated technologies, to develop critical skills, knowledge and practices that will help them thrive in postsecondary, workforce and community environments.

In the table below list some of the tasks or activities you already do that you believe are STEM, and then list some tasks or activities you could do to add STEM to your repertoire.

	Tasks/Activities I Currently Do	Tasks/Activities I Could Do
Interdisciplinary learning		
Design principles		
Real-world connections		
Skill-building
